FrameSAFE

FrameSAFE Safety Manual Template (A Bilingual Guide for Safety on the Jobsite) provides an excellent resource for framers to create their own Safety Program that is compliant with OSHA Standard 1926.20. The bilingual safety manual is designed such that the English runs on the left-hand pages and the Spanish runs on the right-hand pages, for ease in use on the jobsite.

The program also includes Toolbox Talks, single page do's and don'ts on various key topics, provided in English and Spanish, that help trainers communicate safe practices with employees and subs.

Subscribers to the FrameSAFE program will receive access to:

- A pdf of the Safety Manual Template that has been customized with their company's information.
- Pdfs of Toolbox Talks and Safety Posters on topics that coincide with the six sections of the Safety Manual Template.
- A pdf of a Site-Specific Fall Protection Plan Template for use with specific activities that require non-conventional means of fall protection.
- All program updates, new Toolbox Talks and posters as they become available.

Orientation Checklist

This FrameSAFE document is designed to assist members in providing a comprehensive safety overview for new employees on a jobsite. The checklist includes a system to provide each employee with a hard hat number that correlates to their Orientation Acknowledgement, which assists members with safety training documentation. NFC members receive free access to a printable pdf of this checklist as part of their membership.

Hard Hat Stickers

Designed to be used in conjunction with the Orientation Checklist at the start of each new project, these numbered stickers correspond to the Checklist's Acknowledgement Form signatures for easy training and record-keeping. The stickers measure 2.5" wide by 1.5" tall and are available in lots of 100. See NFC website for pricing and to place an order.
