

# LOCKOUT/TAGOUT

- A designated person must turn off and disconnect the equipment or machinery from its source of energy before performing any maintenance or service tasks.
- You can be seriously or fatally injured if the machinery being serviced or maintained unexpectedly energizes, starts up or releases stored energy.
- If you are not trained, you are not authorized to perform Lockout/Tagout procedures!
- If you see equipment that has been locked and/or tagged out, do not attempt to re-energize if you are not the authorized Lockout/Tagout person.
- If you will be involved in energy-control procedures, be sure you are properly trained and completely understand what is expected of you.

- Una persona designada debe apagar y desconectar el equipo o maquinaria de su fuente de energía antes de realizar cualquier mantenimiento o servicio.
- Usted puede ser seriamente o fatalmente lesionado si la maquinaria siendo reparada o mantenida, inesperadamente se energiza, se enciende o suelta energía almacenada sin esperarlo.
- Si usted no ha sido entrenado, no está autorizado para aislar/etiquetar.
- Si usted va a participar en procedimientos de controlar energía, esté seguro de estar entrenado apropiadamente y que entiende completamente que es lo que se espera de usted.

# AISLAR/ETIQUETAR
